Hunt Group Pilots

The Hunt Groups Pilots tab displays any pilot numbers for this Hunt Group. A pilot number is one which when called, enters this Hunt Group.

Click anywhere on a Pilot Line entry to access the CommPortal interface for this line. This allows you to carry out any configuration on the Pilot line, for example you can enable or disable the Unavailable Call Forwarding service for this line and configure the forwarding number that would be used if all your lines were unavailable, for example because there was a power outage at your site.
