

# Presence & Call Manager

## Presence

Let others know whether you are available or busy by setting your presence to **Online** or **Busy**.

Your Presence information automatically shows when you are **Away**, **On the Phone**, or **In a Meeting** (this references the information in your Outlook calendar).

## Call Manager

You can tell Podr how to handle your incoming calls. Click on the **Presence** selector, expand the **Available** option and choose between:

- ☒ Available
- ☐ Do Not Disturb
- ☐ Forwarding

If **Do Not Disturb** is selected, callers hear a recorded voice announcement saying that you are unavailable and are then connected to your voicemail. None of your devices will ring until you turn off Do Not Disturb, so be sure to use it carefully!

You can select **Forwarding** to forward all incoming calls to another number. You are then prompted to enter the number you want to forward calls to.

Note that when you change your Presence or **Call Manager** settings, the change applies on all of your Pod devices. So if you step away from your computer and forget to update your status, you can change your status using the Pod app on your mobile phone instead.

## Choosing Which Calls to Receive

You can specify how calls should be handled if they are from anonymous numbers, from VIPs, or from numbers on your Unwanted Callers list.

To do this, click on the **Presence** selector, expand the **Available** option, and select the **View all settings** option at the end of the menu.

This opens the **Call Manager Status** window, where you can set your call handling preferences.
