INFO: If Pod Connect for Desktop/Android/iOS is not included in you package please skip to the Desk Phones section of this guide. If you would like to know more about Pod Connect for Desktop/Android/iOS please contact your Service Provider. Information on how use Pod Connect for Desktop/Android/iOS can be found here.

To download Pod Connect for Desktop see this guide for detailed instructions: How Do I Download Pod Connect For Desktop?

- Login to the CommPortal with your new password created previously.
- Click on **Downloads**
- Click on **View Apps**
- Click on **pod connect**
- Download and install the the file following the onscreen instructions for your computer operating system

INFO: If you are logging on to the CommPortal from a Windows machine you will only be able to download the Windows version and vice versa if you are logging in on Mac OS.

TIP: If you have multiple machines that require Pod Connect to be installed on you can copy the downloaded file to a USB thumb drive or other media and install from there. This would save time logging into the CommPortal and downloading each time.

To download Pod Connect for Android/iOS see this guide for detailed instructions:How Do I Download Pod Connect For Android/iOS?
